Profile

I am passionate about development and modern technologies and that passion has lead me to this career.

I enjoy reading up and trying new technologies, and love implementing them in new projects, whether they are commercial, internal tools or side projects. I always strive to improve by challenging the way I think, learning from past mistakes and learning from mistakes and issues other people around me face.

I keep up to date with technologies and improve my ways of thinking by reading blogs and watching videos from websites like youtube.

I get a lot of satisfaction out of my work, always trying to impress my peers whether they are clients, managers or colleague developers. I always put 100% into a project, regardless of how small or simple it may be. I am also always willing to help my colleagues with any challenging tasks, as I find teamwork a great provider of learning opportunities.

Skills

- C# / ASP.NET (1,5 years)
- MVC
- Javascript / JQuery
- CSS / Bootstrap
- Java & Android
- SQL
- XAML & Windows store apps / phone
- HTML

Work Experience

SEPT '14 – CURRENT
PORTO, PORTUGAL

ITSECTOR - SISTEMAS DE INFORMAÇÃO,SA
SOFTWARE ENGINEER

As the home banking solution became more popular, and the initial solution became out of date, the decision to improve the system by rewriting it in a more modern approach was made. We use technologies such as ASP.NET MVC 4, js frameworks such as jQuery and also bootstrap to provide the solution of responsive web design.

Skills Used
- ASP.NET MVC 4
- C# & .NET 4.5
- JQuery
- MS SQL 2008
- Twitter Bootstrap
- SVN & TeamCity
- Scrum

FEB '14 – SEPT '14   ITSECTOR - SISTEMAS DE INFORMAÇÃO,SA
PORTO, PORTUGAL   SOFTWARE ENGINEER

The intranet of Medinfar was a maintenance project I was involved in. The initial system had
been poorly designed and, for that reason, plagued with bugs. I was in charge of finding
issues and solving them, as well as developing new modules, like the employees' expenses
management or contracts.

Skills Used
- C#
- SQL
- Sharepoint
- CSS
- Javascript

NOV '13 – FEB '14   ITSECTOR - SISTEMAS DE INFORMAÇÃO,SA
PORTO, PORTUGAL   SOFTWARE ENGINEER

The Commercial GPS project was a proof of concept for the area of CRM. This windows store
app was designed to be used with a Surface tablet to help a sales person on the field. The app
consumes CRM dynamics web services and was written in XAML and C#. This project was
presented at Finovate 2014.

Skills Used
- .NET 4 & C#
- XAML
- Windows Store Apps

Educational Qualifications

SEP '10 – NOV '13   INSTITUTO SUPERIOR DE ENGENHARIA DO PORTO: COMPUTER SCIENCE

- Final year thesis: developed a beekeeping management software, in Java. I was
  responsible for the backend of the solution that included database and logic.
- Group Leader for the second and third year project developing several projects, of
  which I highlight a social network with a three-dimensional software or a human
  resource software.
- EUR-ACE Certified Diploma

SEPT '07 – JUN '10   ESCOLA SECUNDÁRIA DE GONDOMAR, PORTUGAL

- Technical of Management and Computer Systems Programming

Interests

- I was recently inducted to beekeeping
- Like to watch TV shows
- Explore new places
- Playing futsal (I was a federated futsal player, goalkeeper, for 10 years)
